

Rapid Test Kit Availability – Updated October 8, 2021

The on-campus rapid testing tent at the South Windsor Campus will conclude their operation on October 15.

For those who will still need to rapid test every 72 hours (partially vaccinated or non-vaccinated), please be sure to pick up a rapid testing kit if you have not done so already. They will continue to be available from the tent in T lot (front of the College at the South Windsor Campus) until the end of this week. After that time, they will be available from Security in the main lobby. In Chatham and Downtown, they are available from Security at the main building in Chatham and at the Centre for the Arts downtown. Security will be provided with a list of those eligible to pick up a kit. If you have already picked up a kit, please do not get another until you have about 5 tests remaining. As there are 25 tests in a kit, one kit will last you 75 days or 2.5 months.

For those of you who are partially vaccinated, please remember to go back in and select option 1 when you are 14 days past your second dose, and upload your vaccination information/receipt. Please also remember that the College is offering vaccines on campus every Wednesday at the South Windsor location and Thursday at the Chatham location. On your MYSTCLAIR, select the “COVID-19 Vaccine Appointment” to book your appointment.

Information on how to rapid test at home are provided in the kits as well as online at <https://www.stclaircollege.ca/covid-19>.
