

# Directions for Completing Health Assessment Record

Ontario regulations and St. Clair College policy mandate health-screening for students in Nursing, Health Sciences and Community Studies that require a placement as part of their program.

Each student must ensure that they complete and submit through the Verified system the Health Assessment Record Form. This form has 2 parts:

## Part 1 – Immunization/Communicable Disease Record

Your Primary Care Provider, Physician or Nurse Practitioner (NP) must complete the entire form. Please make an appointment as soon as possible with your Primary Care Provider. If you don't have one, the College Health Centre should be available to provide this service. This process may take up to 2 months so please don't delay. Failure to complete it on time may result in a delay start to your placement.

Please obtain a copy of your immunization record from your Primary Care Provider or access it online through your local Public Health Unit.

In addition to your immunization record, you must also provide:

- Copies of serology showing immunity and
- Any prior TB skin test or chest x-ray report.
  - If no prior TB skin test, a 2 step TB skin is mandatory (administered minimally 1 week apart).
  - If there is record of a previous 2 step TB skin test, a 1 step TB skin is all that will be required.
  - If there is record of a previous negative 1 step TB test, within the past 12 months, a 1 step TB test is required to be considered a 2 step.
  - A TB test is NOT required for anyone who has had a previous positive TB skin test (>10mm). A chest x-ray may be required.

## Part 2 – Attestation

In compliance with the recommended health requirements of Communicable Disease Surveillance Protocols for Ontario and other provincial regulations, all students attending a placement are required to provide, at their own expense and prior to the beginning of the placement, an attestation that confirms they are free from communicable disease and are in good physical health. Ongoing health assessments are not required unless there is a specific episode involving contact with a communicable disease.

The St. Clair College Health Centre can assist with the completion of your Health Assessment Record. Please contact them at the appropriate campus to make your appointment.

South Campus – 519.972.2727 ext. 4484

Downtown Campus – 519.252.8311 ext. 5117

Chatham Campus – 519.354.9100 ext.3729

# HEALTH ASSESSMENT RECORD

2025

NAME:		DATE OF BIRTH(MM/DD/YY):	
PROGRAM:		STUDENT ID #:	

## PART 1 - IMMUNIZATION/COMMUNICABLE DISEASE RECORD

HEPATITIS B	Lab reports must be attached to this report.	DATE:		IMMUNITY:	YES	NO
Documented immunity satisfies requirement. If no immunity, first series to be administered at 0-1-6-month intervals (with a minimum of first 2 doses required to be approved for placement). Serology is required after 1 <sup>st</sup> series which may be repeated no sooner than 1 month after first series. If no immunity after the first series, another series of 3 may be required.						
HEP B Dose Series	DATE #1:		DATE #2:		DATE #3:	

Tdap (Tetanus, Diphtheria, Pertussis) _____
Must be up to date within 10 years. If no record of Tdap within last 8 years, must receive booster to cover for duration of program.

DATE OF MOST RECENT VACCINE*:		<i>*Students: refer to your own program's placement requirements</i>					
INFLUENZA		COVID Date 1		COVID Date 2		BOOSTER Date	
		Manufacturer		Manufacturer		Manufacturer	

MEASLES/MUMPS/RUBELLA	DATE #1:		DATE #2:		X Circle here if 2 <sup>nd</sup> dose N/A	
VARICELLA	DATE #1:		DATE #2:			
MMR: Either 2 documented doses of MMR vaccine in childhood or 1 dose after 20 years of age. Varicella: 2 documented doses. If no proof of vaccinations as set out here, serology for immunity is required. <i>If vaccine is required, complete TB test first.</i>						
Attach lab reports for MMR	DATE:		IMMUNITY:	YES	NO	
Attach lab reports for Varicella	DATE:		IMMUNITY:	YES	NO	

TUBERCULOSIS TESTING						
A 2-step TB test is required for any initial TB testing. The 2 <sup>nd</sup> test is to be administered no sooner than 7 days after the 1 <sup>st</sup> TB skin test and no longer than 12 months later. With the documented record of a NEGATIVE TB skin test in the past 12 months, the student only requires a 1-step TB skin test. If there is a history of a POSITIVE TB skin test, a chest x-ray must be done instead of a TB skin test.						
TBST # DATE ADMINISTERED:		DATE READ:		NEG/+ mm	INITIALS:	
TBST #2 DATE ADMINISTERED:		DATE READ:		NEG/+ mm	INITIALS:	
<b>NOTE:</b> A TB test must be read 48-72 hrs. after administration to be valid. A positive TB test of 10mm or greater requires chest x-ray.						
CHEST X-RAY	DATE:		RESULTS:	NEGATIVE	POSITIVE FOR ACTIVE TB	

## PART 2 – ATTESTATION

I hereby certify that the above-named student does not have any known health concerns that would seriously impact participation in their placement facility activities and are free from any communicable diseases to the best of my knowledge based on a physical health assessment, immunization review and tuberculosis screening that was conducted.
