Directions for Completing Health Assessment Record

Ontario regulations and St. Clair College policy mandate health-screening for students in Nursing, Health Sciences and Community Studies that require a placement as part of their program.

Each student must ensure that they complete and submit through the Verified system the Health Assessment Record Form. This form has 2 parts:

Part 1 – Immunization/Communicable Disease Record

Your Primary Care Provider, Physician or Nurse Practitioner (NP) must complete the entire form. Please make an appointment as soon as possible with your Primary Care Provider. If you don't have one, the College Health Centre should be available to provide this service. This process may take up to 2 months so please don't delay. Failure to complete it on time may result in a delay start to your placement.

Please obtain a copy of your immunization record from your Primary Care Provider or access it online through your local Public Health Unit.

In addition to your immunization record, you must also provide:

- Copies of serology showing immunity and
- Any prior TB skin test or chest x-ray report.
 - If no prior TB skin test, a 2 step TB skin is mandatory (administered minimally 1 week apart).
 - If there is record of a previous 2 step TB skin test, a 1 step TB skin is all that will be required.
 - If there is record of a previous negative 1 step TB test, within the past 12 months, a 1 step TB test is required to be considered a 2 step.
 - A TB test is NOT required for anyone who has had a previous positive TB skin test (>10mm). A chest x-ray may be required.

Part 2 - Attestation

In compliance with the recommended health requirements of Communicable Disease Surveillance Protocols for Ontario and other provincial regulations, all students attending a placement are required to provide, at their own expense and prior to the beginning of the placement, an attestation that confirms they are free from communicable disease and are in good physical health. Ongoing health assessments are not required unless there is a specific episode involving contact with a communicable disease.

The St. Clair College Health Centre can assist with the completion of your Health Assessment Record. Please contact them at the appropriate campus to make your appointment.

South Campus – 519.972.2727 ext. 4484. Downtown Campus – 519.252.8311 ext. 5117. Chatham Campus – 519.354.9100 ext.3729.
